

Dear Diary,

we are in hard times because of the corona virus. There is no school, we can't go outside and we have to work at home.

I've made myself a daily routine that I try to use for every day. I try to think it is like a trip.

At 9 am I wake up and read a book till my travel guide named "mom" says that I must wash myself. Then I make a trip to the bathroom and change my clothes. After this I make an excursion to the kitchen where I eat cereals for breakfast.

At about 10 am I visit my room and have four lessons for my homeschooling with short breaks. I like homeschooling because I can choose subjects which I want to do and can take breaks whenever I want.

But sometimes I get bored because in the break there are no friends who I can play together and have fun. 😞

However, let's go on with my daily routine.

At about two pm every day we have a very yummy lunch. I cook together with my parents. Yesterday I made cordonbleu and my bother potato gratin by ourselves.

After lunch I have freetime. In this time I play table tennis, soccer or sometimes computer games like nonogram, a logic game. I like to play table tennis with my dad and I win mostly. 😊 Sometimes we go for a walk and find geocaches.

In the afternoon I usually practice the tuba or the violin. Last Sunday evening we (Dad, my brother and I) gave a little concert on the balcony for our neighbours in our house. That was really cool and the neighbours were happy and clapped.

At about 7 pm we have dinner and usually watch together a film or TV Show. My favorite TV series are Merlin of BBC and the voice of kids.

After that I make a tour to the bathroom and brush my teeth. At about 10 pm I go, after very hard day, to bed and read and read and read my books.

And then, at about midnight my mom comes into my room, sees that I am still awake, very angry and says (screams) that I have to sleep and then I sleep.
