

My personal coronavirus experience

24th march 2020

My blog Corona-time.

Coronavirus. A word, that is really popular and heard everywhere. Many people are in panic and are running to the supermarket, buying a whole trolley full of toilet paper. We hear breaking news like "Vapiano can't pay anymore" or "a man died because of corona" and so on. Because so many people wanted lots of toilet paper our neighbours didn't get anything. Friends of us had to use cloth nappys because all other nappys were gone...

There are many stories like this...

At my home we get up at seven o'clock every morning and then we start getting things done. We are really lucky because our school is more digital than others and we get our exercises through office.

I heard about other schools, who had to make themselves digital in a few days, which was really complicated. At my school we have enough work to do but I heard that many kids are really bored and are a pain in the neck of their parents. My mom saw that the most popular books on amazon.de are jigsaw puzzles and other activity books for children.

Many children are made busy by watching TV or skypeing with friends. In Switzerland so many did that, that they couldn't do that anymore.

Yes, I hope you all keep healthy and not everyone is going to panic. Good luck!
